CONTENTS

Volume 9 1965

Pages

ADNEY, J. E. and YEN, TI, Automorphisms of a p-group . . . 137–143

AHERN, P. R. and JEWETT, R. I., Factorization of locally compact abelian groups. 230–235

AX, JAMES, On the units of an algebraic number field. 584–589

BLOCK, RICHARD E., The Lie algebras with a quotient trace form . 277–285

BOURGIN, D. G., Multiplicity of solutions in frame mappings . . 169–177

BRACE, JOHN W., Convergence on filters and simple equicontinuity. 286–296

BROWDER, FELIX E., Remarks on nonlinear functional equations, II . 608–616

———, Remarks on nonlinear functional equations, III . . . 617–622

BUCKHOLTZ, J. D., Power series whose sections have zeros of large modulus. II 457–461

CANTOR, DAVID G., On the elementary theory of Diophantine approximation over the ring of adeles I 677–700

CHOKSI, J. R., Non-ergodic transformations with discrete spectrum . 307–320

CHOW, Y. S., A martingale convergence theorem of Ward's type . . 569–576

CHOW, Y. S. and ROBBINS, HERBERT, On optimal stopping rules for s_n/n. 444–454

COX, RAYMOND H., Integral equations on a Hilbert space . . . 256–260

CRONHEIM, ARNO, T-groups and their geometry 1– 30

DADE, E. C., The maximal finite groups of 4×4 integral matrices . 99–122

DAWSON, DAVID F., On the transformation of sequences and related convergence criteria for continued fractions 123–128

DE LEEUW, KAREL and HERZ, CARL, An invariance property of spectral synthesis 220–229

EILENBERG, SAMUEL and MOORE, JOHN C., Adjoint functors and triples 381–398

ELLIOTT, JOANNE, Dirichlet spaces associated with intego-differential operators. Part I 87– 98

Pages

FORELLI, FRANK, Homomorphisms of ideals in group algebras . . 410–417

GINSBURG, SEYMOUR, HIBBARD, THOMAS N., and ULLIAN, JOSEPH S., Sequences in context free languages. 321–337

GLICKSBERG, I., Fourier-Stieltjes transforms with small supports. . 418–427

HAHN, F. J., Skew product transformations and the algebras generated by $\exp(p(n))$. 178–190

HAMSTROM, MARY-ELIZABETH, The space of homeomorphisms on a torus 59– 65

———, A note on homotopy in homeomorphism spaces. 602–607

HEINEKEN, HERMANN, Commutator closed groups. 242–255

HELLER, A. and REINER, I., Grothendieck groups of integral group rings 349–360

HERZ, CARL, with DE LEEUW, KAREL, An invariance property of spectral synthesis. 220–229

HIBBARD, THOMAS N., with GINSBURG, SEYMOUR and ULLIAN, JOSEPH S., Sequences in context free languages. 321–337

HOFMANN, KARL HEINRICH, Lie algebras with subalgebras of codimension one 636–643

HORNE, J. G., JR., A locally compact connected group acting on the plane has a closed orbit. 644–650

HSIANG, W.-C. and SANDERSON, B. J., Twist-spinning spheres in spheres 651–659

JAKIMOVSKI, A. and MEIR A., Regularity theorems for $[F, d_n]$-transformations 527–534

JANOWITZ, M. F., Quantifier theory on quasi-orthomodular lattices. 660–676

JEWETT, R. I., with AHERN, P. R., Factorization of locally compact abelian groups. 230–235

JONES, ALFREDO, On representations of finite groups over valuation rings 297–303

KAHN, DANIEL S., Homology of function spectra. 468–484

KEGEL, OTTO H., On the solvability of some factorized linear groups. 535–547

KERR, GERALD L., Almost-Gaussian domains. 559–568

KNIGHT, FRANK, Note on regularization of Markov processes. . . 548–552

Pages

KNOPP, M. I. and NEWMAN, M., Congruence subgroups of positive genus of the modular group. 577–583

KOEHLER, JOHN E., S.J., The type set of a torsion-free group of finite rank. 66– 86

KUNITA, HIROSHI and WATANABE, TAKESI, Markov processes and Martin boundaries. Part I. 485–526

LEONARD, HENRY S., JR., On finite groups which contain a Frobenius factor group. 47– 58

LEWKOWICZ, R. E., An abstract extent function. 199–203

———, Lebesgue measure and the n-area of homeomorphisms. . . 204–206

LINDERHOLM, CARL E., Extension of unitary operators. 455–456

LU, CHIN-PI, On the unique factorization theorem in the ring of number theoretic functions. 40– 46

MANN, H. B., Difference sets in elementary abelian groups. . . . 212–219

MASERICK, P. H., Convex polytopes in linear spaces. 623–635

MEIR, A., with JAKIMOVSKI, A., Regularity theorems for $[F, d_n]$-transformations 527–534

MONTGOMERY, HUGH L., Distribution of irregular primes. . . . 553–558

MOORE, JOHN C., with EILENBERG, SAMUEL, Ajdoint functors and triples 381–398

NEUBERGER, J. W., A generator for a set of functions. 31– 39

NEWBERGER, STUART M., The σ-symbol of the singular integral operators of Calderón and Zygmund. 428–443

NEWMAN, M., with KNOPP, M. I., Congruence subgroups of positive genus of the modular group. 577–583

OLER, NORMAN, Zassenhaus' lemma on sectorial norm-distances. . 338–342

O'REILLY, M. F., On the semisimplicity of the modular representation algebra of a finite group. 261–276

PISOT, CH., and SCHOENBERG, I. J., Arithmetic problems concerning Cauchy's functional equation II. 129–136

QUINTAS, LOUIS V., The homotopy groups of the space of homeomorphisms of a multiply punctured surface. 721–725

RADEMACHER, HANS, On the number of certain types of polyhedra. . 361–380

Pages

REINER, I., with HELLER, A., Grothendieck groups of integral group rings 349–360

REYNOLDS, W. F., Projective representations of finite groups in cyclotomic fields. 191–198

ROBBINS, HERBERT, with CHOW, Y. S., On optimal stopping rules for s_n/n. 444–454

ROBINSON, DEREK S., Joins of subnormal subgroups. 144–168

SAKAI, SHÔICHIRÔ, On topologies of finite W^*-algebras. 236–241

SANDERSON, B. J., with HSIANG, W. -C., Twist-spinning spheres in spheres 651–659

SANSONE, FRED J., A mapping of regressive isols. 726–735

SCHAEFER, PAUL, Core theorems for coregular matrices. 207–211

SCHOENBERG, I. J., with PISOT, CH., Arithmetic problems concerning Cauchy's functional equation II. 129–136

SHULT, ERNEST E., On groups admitting fixed point free abelian operator groups. 701–720

SMITH, P. A., Periodic transformations of 3-manifolds. 343–348

THORP, EDWARD O., and WHITLEY, ROBERT J., Operator representation theorems. 595–601

TURYN, RICHARD, The nonexistence of seven difference sets. . . . 590–594

ULLIAN, JOSEPH S., with GINSBURG, SEYMOUR and HIBBARD, THOMAS N., Sequences in context free languages. 321–337

WARNE, R. J., A characterization of certain regular d-classes in semigroups 304–306

WATANABE, TAKESI, with KUNITA, HIROSHI, Markov processes and Martin boundaries. Part I. 485–526

WEIDMAN, DONALD R., The character ring of a finite group. . . . 462–467

WHITLEY, ROBERT J., with THORP, EDWARD O., Operator representation theorems. 595–601

WRIGHT, C. R. B., Nilpotency conditions for finite loops. 399–409
